Subject: Application for Laravel Backend Developer (3+ Years' Experience)

Dear Mr. Zafar Jamil,

I hope this letter finds you in great health and spirits.

I am writing to express my keen interest in the Laravel Backend Developer position at Sysreforms International for the upcoming 2–3 month project. With over three years of experience in Laravel development, I have built and maintained scalable backend systems for SaaS applications, HRM solutions, e-commerce platforms, and customized CRMs.

Throughout my career, I've worked on feature-rich platforms like **CareerConnect**, **Excel Labs**, **Tidal Trip**, **MindSet**, **Baladi Express**, and **E-Leasing**, where I handled API design, modular database architecture, secure authentication, payment gateway integrations, and role-based access control. I have a solid grasp of Laravel's core functionalities, including Eloquent ORM, middleware, queues, notifications, and RESTful API development. My experience extends to real-time updates, third-party service integration, and performance optimization, ensuring smooth user experiences and reliable backend infrastructure.

What attracts me to this opportunity is the chance to work with a company like Sysreforms International that values customized tech solutions and innovation. I am confident that my skill

set and passion for backend development will allow me to contribute meaningfully to your team's success.

I would appreciate the opportunity to speak further about how I can contribute to your project and support your development goals.

Thank you for considering my application.

Sincerely,

Abdul Moiz Farooq
