PROFILE

Experienced Full Stack Developer with 3+ years of expertise in building Saas applications, e-commerce platforms, and custom web solutions using PHP, Laravel, Codeigniter, JavaScript, and MySQL. Proficient in integrating payment gateways, developing REST APIs, and implementing MVC architecture, and managing shared server deployments. Skilled in version control using Git, ensuring collaborative and efficient workflows.

Known for delivering scalable and maintainable solutions, mentoring junior developers, and ensuring adherence to best coding practices.

PROFESSIONAL EXPERIENCE

Software Engineer   11/2021 – Present
IG Tech Services   Islamabad, Pakistan

- Developed and maintained SaaS, e-commerce platforms and web solutions, Islamabad, Pakistan improving system efficiency by 20%.
- Collaborated with cross-functional teams to deliver 10+ projects on time.
- Designed efficient database schemas, supporting business processes and ensuring optimal performance.
- Mentored junior developers, fostering a culture of code quality and collaboration.
- Streamlined existing CRM systems, reducing customer response time by 1.5%
- Wrote clean, reusable code, enhancing maintainability and scalability.

Software Engineer Internee   09/2021 – 10/2021
PICL Head Quarters   Islamabad, Pakistan

- Participated in design discussions and pre sprint planning exercises Islamabad, Pakistan

EDUCATION

Bachelor of Science in Software Engineering   02/2018 – 02/2022
Comsats University Islamabad

SKILLS

Frontend
HTML, CSS, JavaScript, Bootstrap, jQuery, React Js

Backend
PHP, Laravel, Codeigniter

Database
MySQL

Tools & Technologies
Git, REST APIs, Stripe

PROJECTS

Portfolio Website
Technologies: React.js, HTML, CSS, JavaScript

- Developed a personal portfolio website to showcase projects and skills.
- Implemented responsive design principles for an optimal user experience on all devices.
- Integrated navigation and smooth scrolling for improved usability

ATCS – Aviation Tool Compliance System
Technologies: PHP, Laravel, Bootstrap, JavaScript, jQuery, MySQL
- Engineered a high-compliance system for issuing, tracking, and managing aviation tools, PME/PMI, and calibrated equipment.
- Integrated biometric and barcode-based authentication for secure tool access and traceability.
- Built dedicated PME/PMI modules for lifecycle tracking, calibration scheduling, and audit logging to ensure operational readiness.
- Enabled real-time inventory control, calibration alerts, and tool status monitoring in line with aviation safety standards.
- Designed tool kit verification with sub-tool visibility and colour-coded issuance/return checks.
- Implemented role-based access control with full audit trails and a dashboard for actionable insights.
- Enforced tool accountability via a day-end store closure mechanism, preventing shutdown until all tools are returned.
- Delivered a scalable, audit-ready platform with advanced store configuration and future-ready multi-site support.

TicketWave
Technologies: PHP, Laravel, Bootstrap, JavaScript, jQuery, MySQL, Laravel Echo (Pusher)
- Developed a helpdesk platform with a landing page, showcasing company insights, services, and featured products.
- Integrated real-time anonymous chat using Laravel Pusher for agent notifications.
- Enabled ticket creation with product linking, agent assignment, and priority settings (12–72 hrs).
- Implemented a Kanban board to track ticket status across projects.
- Automated email updates to inform customers of complaint progress.
- Built an admin panel for product management, user roles, and agent control.

HRMS
Technologies: PHP, Loravel, Bootstrap, MySQL, JavaScript, jQuery
- Developed a comprehensive HRM system with modules such as employee creation, attendance, leaves, termination, resignation, transfer management and payroll.
- Integrated a biometric device for attendance tracking and real-time updates.
- Implemented job creation and recruitment workflows, including scheduling interviews and tracking candidate statuses.
- Managed different roles with varied access control, including Admin HR, Managers, and Employce roles, cach with specific pages and permissions.
- Included features for managing branches, departments, interview schedules, event scheduling, and employee performance reviews.
- Built dynamic reporting tools for analytics on employee attendance, leave patterns, and payroll.

E-Leasing Platform
Technologies: PHP, Loravel, Bootstrap, MySQL, JavaScript, jQuery
- Developed a leasing platform with a hierarchical roles system to manage properties and lands.
- Enabled upper-level users to assign properties and make public listings for auctions with custom visibility options.
- Built a leasing platform facilitating online applications, approvals, and payments.
- Ensured smooth integration of roles for administrators and other stakeholders in the leasing process.
- Integrated advanced search and filter functionalities for property listings and auctions.
- Designed automated notification systems for bidding updates, approvals, and payments.
- Implemented a secure payment system with support for multiple payment gateways.
- Added modules for tracking property ownership history, tenant management, and Icase renewals.
- Ensured scalability and case of management through modular development.
- Created a user-friendly interface for property management and auctions.
- Ensured smooth integration of roles for administrators and other stakeholders in the leasing process.

CareerConnect
Technologies: PHP, Loravel, MySQL, Bootstrop, JavaScript, jQuery
- Developed a platform for job applications with separate portals for Admin and Candidates.
- Enabled candidates to set up detailed profiles, apply for jobs, and check application statuses.
- Integrated cron jobs to sync job postings across two secure databases.
- Implemented email verification for enhanced security.
- Handling data for over 10,000 clients.
- Implemented secure authentication and authorization mechanisms.
- Enhanced reporting capabilities with dynamic PDF and Excel generation.

Tidal Trip
Technologies: PHP, MySQL, JavaScript, jQuery, Bootstrop, Stripe
- Developed a platform with three distinct portals: Admin, Host, and Traveler.

- Integrated a chat system for seamless communication between hosts and travelers.
- Enabled booking of trips, secure payments using Stripe, and rating of hosts.
- Included features for trip listings, destination highlights, activities, and email verification.
- Developed a travel platform enabling users to book adventure tours, with a user friendly search engine and activity catalog.
- Integrated online payment systems for secure transactions.

Excel Labs
Technologies: PHP, Codeigniter 4, Bootstrap, JavaScript, jQuery, MySQL
- Completed frontend development for over 25 unique Figma screens with full mobile responsiveness.
- Integrated APIs for seamless transitions from test bookings to the checkout process.
- Designed a self-care tool integrating over ,500 diagnostic tests.
- Implemented a custom reporting system for patient test results with real-time updates.

MindSet
Technologies: Laravel, MySQL, Rest APIs, FHIR API
- Designed the database schema and implemented FHIR API for accessing and exchanging medical and patient data.
- Developed a mental well-being app offering meditations, sleep stories, and journaling tools to promote user wellness.
- Integrated a daily check-in feature with personalized recommendations based on user responses.
- Built admin tools for managing content updates, user feedback, and analytics.
- Ensured compliance with medical data privacy standards through secure API integrations.

Baladi Express
Technologies: PHP, Loravel, Bootstrap, JavaScript, jQuery, MySQL, Stripe Payment
- Built an e-commerce platform serving customers across Qatar, with Stripe integration for seamless payments.
- Implemented features for document signing and PDF generation.
- Designed a user-friendly product search with filters for an enhanced shopping experience.
- Integrated multi-currency support to cater to a global audience.
- Developed a robust order tracking system with real-time updates.

Sharc
Technologies: PHP, CodeIgniter 4, Bootstrap, JavaScript, jQuery, MySQL, Stripe Payment
- Developed a yacht and cruise booking system with live availability updates and seamless booking workflows.
- Integrated stripe for payment processing and document management.
- Added document management features for booking confirmations and agreements.
- Designed a custom admin panel for managing fleet schedules and pricing.
- Enhanced user experience with real-time booking updates and notification alerts.

Igtechservices
Technologies: PHP, Loravel, Bootstrap, JavaScript, jQuery, MySQL, Google Maps, Stripe Poyment
- Built a CRM system with features for customer management and extensive support.
- Enhanced usability with Google Maps and ReCAPTCHA integration.
- Developed a comprehensive analytics dashboard for tracking customer interactions and sales performance.

Buy&Sale
Technologies: PIIP, JovaScript, jQuery, MySQL, Third-Party APIs
- Developed an e-commerce platform for online shopping with coupon generation and delivery tracking.
- Designed a seller dashboard for inventory management and sales tracking.
- Enhanced user engagement with personalized product recommendations and promotional offers.
- Focused on regional users in Wah Cantt and Islamabad.
